Arbor Vetum Planters

**Arbor Vetum** is committed to producing the highest quality outdoor furniture using only the finest and most eco-friendly teak timbers.

Their carpenters are dedicated to the art of hand making beautiful pieces of furniture using only traditional carpentry techniques.

Arbor Vetum furniture is used every day, all over the world, in gardens both great and small. On patios, decks and terraces. Beside swimming pools, spas and beaches.

The possibilities are endless, the choice, quite simply yours...

# Environmental Philosophy

ArborVetum is deeply committed to protecting the natural environment and was both founded on, and adheres to, strong environmental principles. In order to fulfill their environmental aims they do however prefer to follow the Latin maxim “fama extendere factis” or “extending words by deeds” .They like action, not hype, and work very hard to ensure that they sustain these important objectives by running a viable and profitable business.

Every single Arbor Vetum product is 100% made from salvaged and reclaimed teak timbers, eliminating the need to cut down living trees. They are internationally recognized for their commitment to this philosophy and are independently certified to the highest environmental standards by both the Forest Stewardship Council (FSC) and SmartWood and are producers of genuinely ecological furniture.

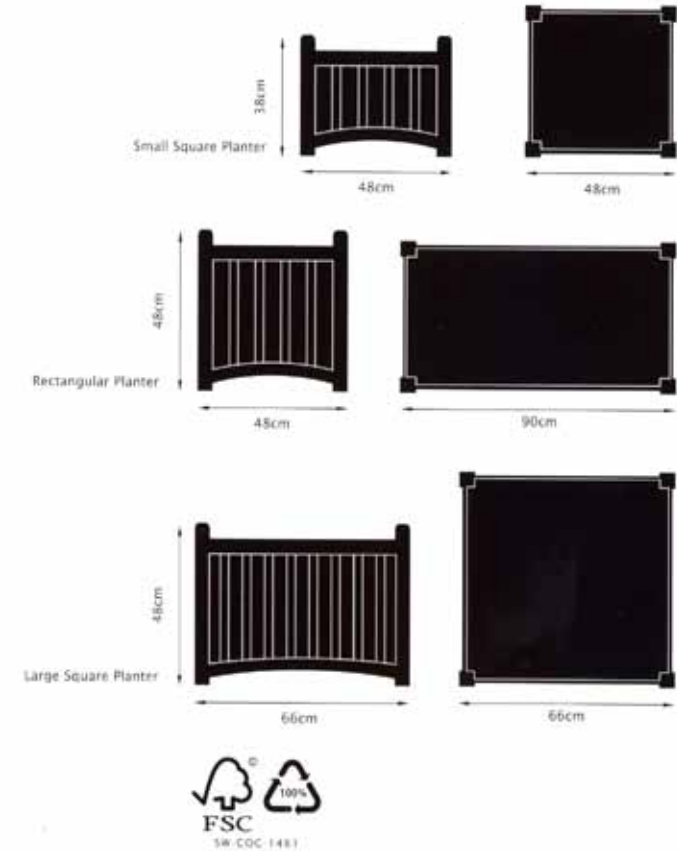

Arbor Vetum is extremely proud to be one of the few companies in the world that can guarantee that an investment in their furniture is an investment in furniture with an extremely clear conscience.

# Planters

The Eclipse planters feature a beautiful layered panel design and are available in three convenient sizes with PVC liners for all manner of planting projects.
