Metal Planters

Large Planter

Gregory Planters

These were designed for maximum strength and durability, especially where such plants as Bamboo are required. They are constructed from 3mm steel sheeting, and reinforced inside. To enable ease of installation, hooks have been welded on the inside.

The planters in the photos have been hot dipped galvanized, which can be additionally sprayed with a color of your choice.

Further options are feet, and a reservoir for those who wish to have a low maintenance solution.

Painted Small Planters

Trough Planters

Kerr Planters

Unique design in oak and steel make these planters an attractive option for most modern terraces. One of the big advantages of these plant containers is the size, which gives the possibility to plant large screening plants on your terrace without the need for excavation, and giving immediate height.

The design is flexible and can be made in any size or color to your specification.

Further options are feet, and a reservoir for those who wish to have a low maintenance solution.

Oak and Galvanized Steel Planters

Oak & Stainless Steel Planters

Clark Planters

These planters were designed for those that have a love for stone. Made from 316 Stainless steel, and any stone of your choice, they are a life time investment in quality. A large selection of frost resistant stone is available in many colors and textures, and they can be made in any size to your specification.

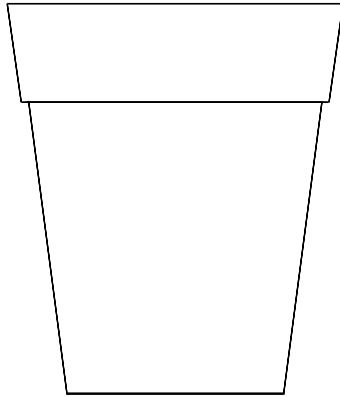

Further options are feet, and a reservoir for those who wish to have a low maintenance solution.
